

TELECOM NAMIBIA

Building Namibia's Digital Foundation

How Broadband Infrastructure Drives
Inclusive Growth, Jobs, and Economic Opportunity

9th National ICT Summit 2026

Ongwediva Trade Centre | 12–16 October 2026

Vivian Mieze

Senior Manager: FMC Core & Wireless Access

sharing your world

Reliable, affordable broadband opens the way to participation.

INCLUSIVE GROWTH

More citizens and businesses able to participate.

JOBS

Opportunities for employment and enterprise.

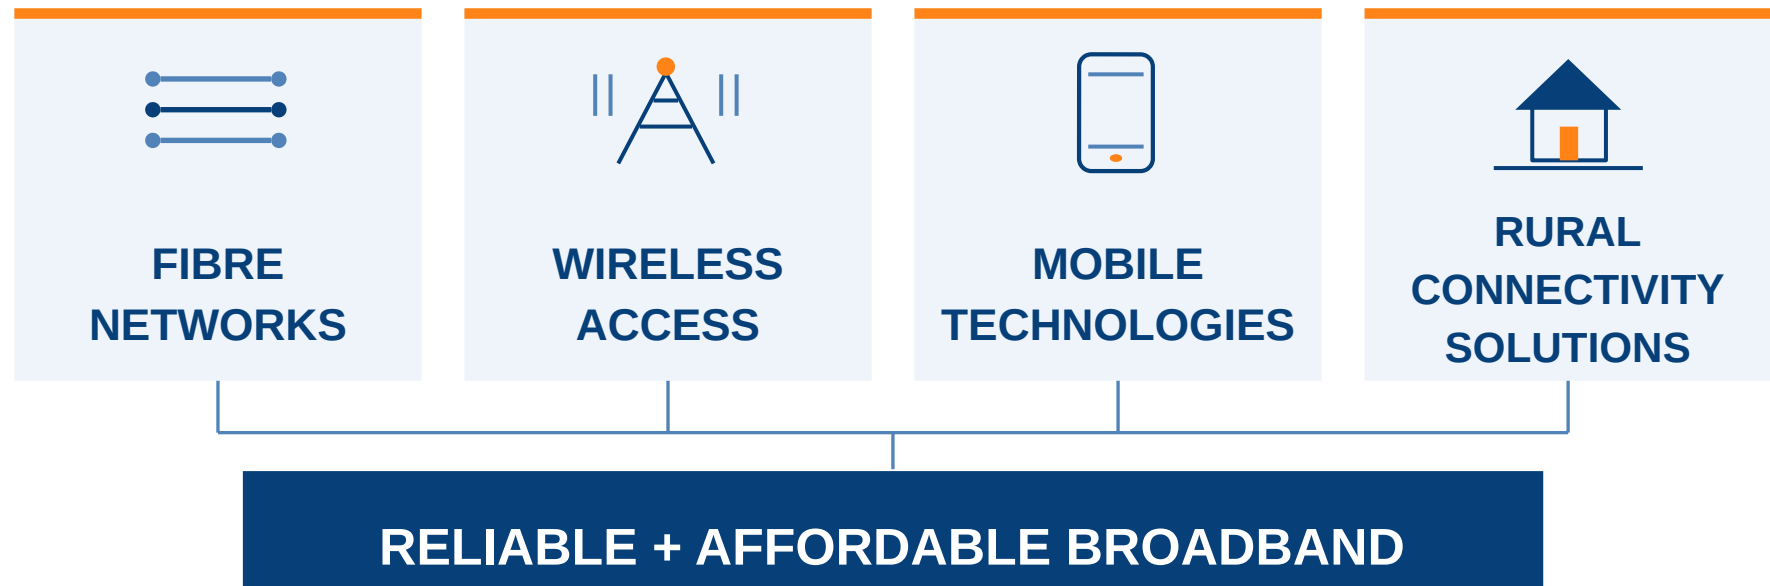

ECONOMIC OPPORTUNITY

Innovation, investment and participation in wider markets.

♦ **Connect Namibia to participation, work and economic opportunity.**

Four infrastructure areas. One development purpose.

For citizens, businesses and the services communities use.

- ♦ The network is the foundation; participation is the purpose.

The digital economy must include citizens and businesses.

CITIZENS

Access opportunities in education, services and economic activity.

BUSINESSES

Participate through entrepreneurship, innovation and economic opportunity.

ACROSS URBAN AND RURAL COMMUNITIES

- ♦ **Bridge the digital divide—not only expand the network.**

Inclusive growth also means access to essential services.

EDUCATION

Broader access to learning opportunities.

HEALTHCARE

New opportunities for connected health services.

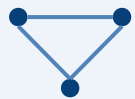

PUBLIC SERVICES

New ways to access digital public services.

- ♦ Learning, healthcare and public services belong in digital inclusion.

Jobs around the network—and opportunities through its use.

WORK AROUND THE NETWORK

Network activity

- ◆ Planning and deployment
- ◆ Operation and modernisation

OPPORTUNITIES THROUGH ITS USE

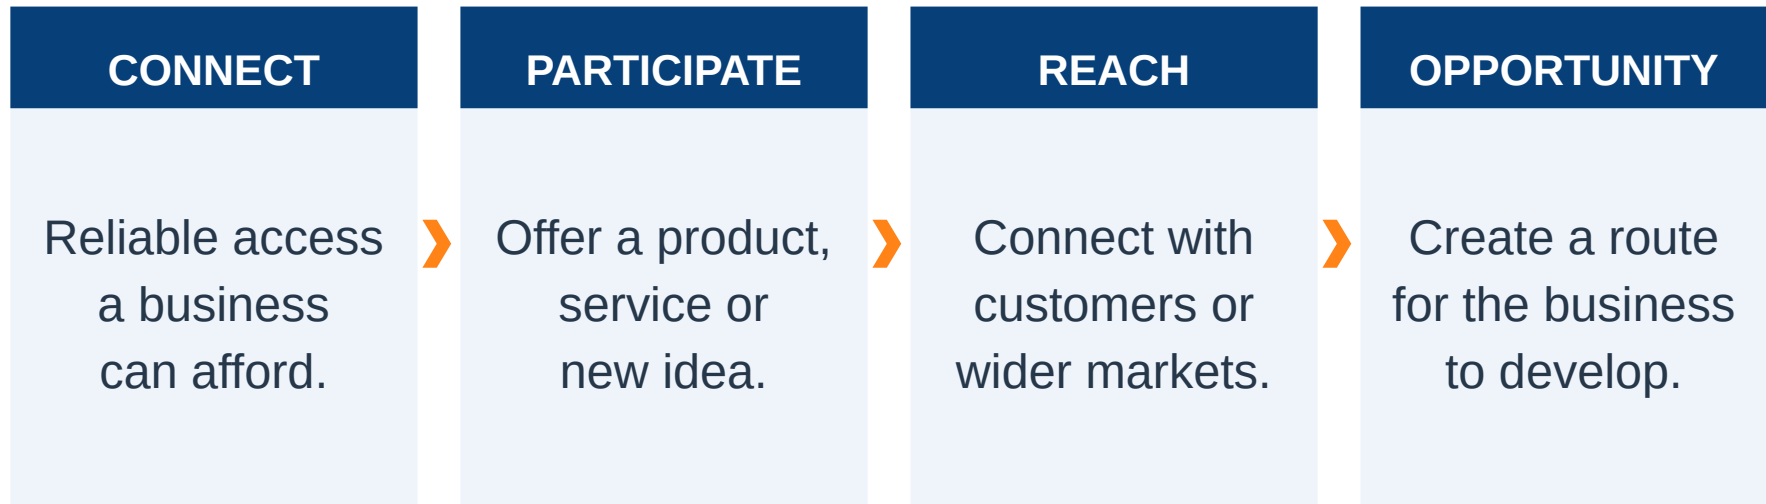

Economic participation

- ◆ Entrepreneurship and innovation
- ◆ Participation by businesses

◆ **Connections can support employment; they are not job counts.**

From a broadband connection to a business opportunity.

ILLUSTRATIVE BUSINESS PATHWAY

A connection enables participation; business outcomes depend on how it is used.

- ♦ **Broadband enables participation; opportunity depends on its use.**

Expansion must address access, reliability and affordability.

URBAN COMMUNITIES**RURAL COMMUNITIES****SHARED QUESTIONS FOR BROADBAND EXPANSION**

- ♦ **ACCESS** Can citizens and businesses connect?
- ♦ **RELIABILITY** Can they depend on the service?
- ♦ **AFFORDABILITY** Is the connection affordable to use?

♦ **The national ambition is universal connectivity—not selective access.**

**As a State-Owned Enterprise,
TN supports the national agenda for inclusive digital access.**

SOE MANDATE

Support government development priorities through national ICT infrastructure.

REMOTE COMMUNITIE S

Extend access to underserved and hard-to-reach areas.

PUBLIC SERVICES

Enable schools, clinics and public institutions to participate digitally.

MEANINGFUL ACCESS

Focus on reliable, affordable connectivity that communities can use.

- ♦ **For TN, inclusivity means connecting remote communities to opportunity—not only expanding coverage.**

THE DIGITAL FOUNDATION WE ARE BUILDING

**Inclusive growth.
Jobs and economic opportunity.
A more resilient Namibia.**

Broadband is the foundation.
Opportunity is what we build on it.
